

WORLD BIODYNAMIC DAY 2018.

Join in and celebrate almost 100 years of biodynamic agriculture!

The World Biodynamic Day invites people from around the world to join farmers & gardeners and be for a few hours part of the biodynamic magic. Learning about biodynamics, celebrating and last but not least, spray the sacred biodynamic preparations together as a community. At the same local time. Worldwide.

EVERYONE IS INVITED!

You can be a farmer or gardener, hobby gardener or someone who wants to learn more about biodynamics. Last year over 300 people registered their farm and garden on facebook from all over the world. Everyone had their own way of World Biodynamic Day celebration. There were sleepovers, BBQ's, Eurythmy performances, story telling at a local Waldorf School, lectures or farm walks and not to forget, stirring and spraying of the biodynamic preparations.

NEW THIS YEAR:

There will be a hashtag (**#worldbiodynamicday**) that everyone can use, when posting photos or videos from the Worldday. Just add #worldbiodynamicday to your photos & videos you post on facebook, instagram, twitter and Co – so everyone can find out how others have celebrated.

YOUR PARTICIPATION:

Everyone can take part, there is no farm required or garden, you can start an event at your school or church – anywhere where you feel called to. If you think of holding an public event on the Worldday, you can register your farm, garden, school, church or place on the worldmap on this page (<http://worldbiodynamicday.org/worldmap/>) or register if you seek an event.

HELP SPREADING THE WORD.

If you could help spreading the world on social media or email, your lokal schools, groups, that would be wonderful. You can find all text, photos & short videos on www.worldbiodynamicday.org/downloads.
